WORK EXPERIENCE

Title/Position Freelance

Built different projects which include the system included in Jinnah International Airport for management of duty shifts. I built that project for Airport Security force .

I am doing a bachelor's program in computer science and I have been doing freelance projects of web development for a long time. I have a good understanding of languages that are necessary for a front-end developer which includes HTML5, CCS3, and JavaScript, and Sir recently I have been working on getting better in React library.

I have a great understanding of SEO and digital marketing because I started a small e-commerce business and I worked on the SEO department solely on it, From which I achieved an enormous amount of knowledge.

Good understanding of WordPress Development and knowledge of all the necessary plugins required to create a flawless product.

Title/Position Workplace/Company
